## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5-11, 13-18 and 20-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Hestehave et al. (5,118,014). Hestehave et al. disclose, in figs. 1 and 3-6, a lid comprising a cap having a handle 12, a top face, a sip and vent ports 13, a release lever 20 having a thumb pad detachably pivotally coupled to the cap about a pivot point, and biasing mechanism (spring 25). The release layer forms fork having two arms with a vent lug and sip lug are coupled to the distal end of each arm.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4, 12 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hestehave in view of Eger et al. (5,222,623).

Eger et al. teach a lower portion of a lid having a detachable snap-fit engagement for coupling to a container.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the lower portion of the Hestehave lid with a detachable snap-fit engagement for quickly coupling and removing the lid with the container.
